3.APP Introduction

The APP includes four sections as “Devices” , “Messages” , “Albums” , and “My”

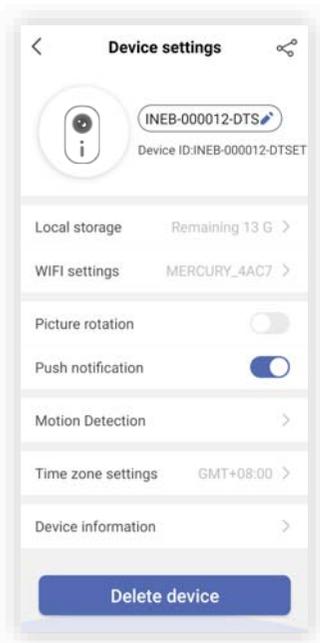

3.1 Devices

- Add device: click “ + ” on the upper right corner to add camera
- Delete device: Click “ X ” to delete the device from the list
- Sharing: click “  ” to share this camera to your loved ones
- Live play: click “  ” for live view, you can screenshot, record video and do other operations on this interface

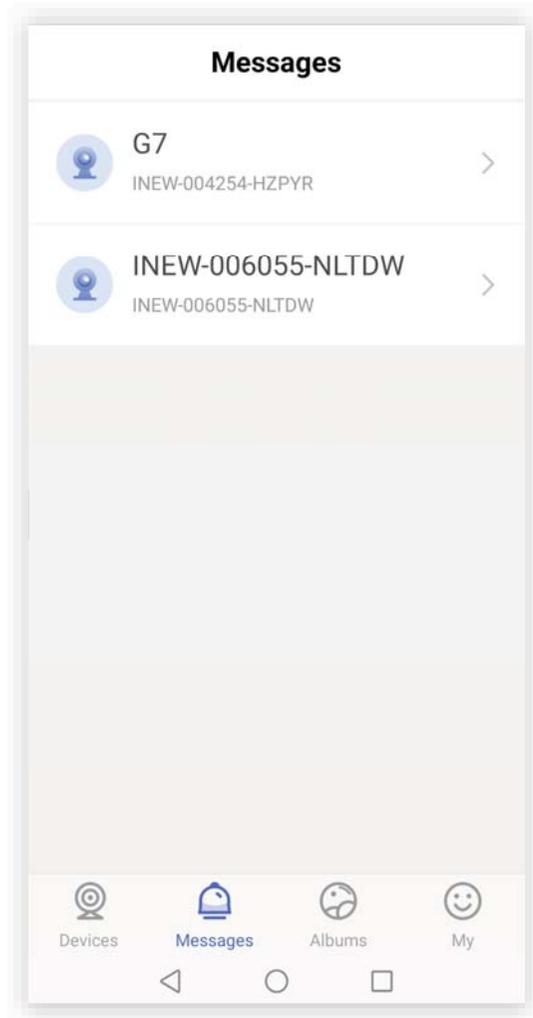

- Voice from camera: click "  " to enable or disable the voice
- Screen shot: click "  " to keep a screen shot from live video
- Playback: click "  " to play back
- Recording: click "  " to record a video
- Full screen: click "  " for full screen viewing
- Talk to camera: press "  " to talk with camera
- Settings: click "  " to configure device settings

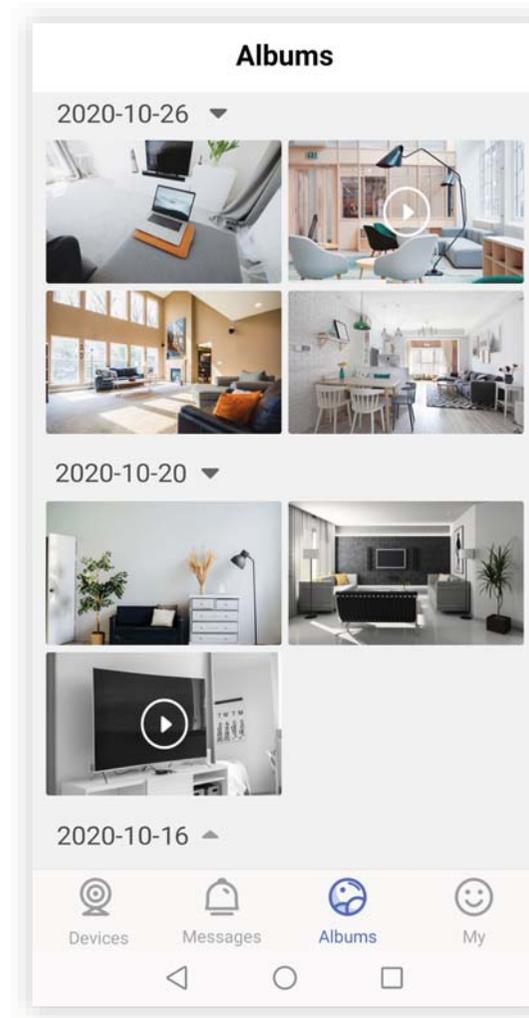

- You could configure sharing, nick name, WiFi, picture rotation, push notification, motion sensitive and others on this

3.2 Messages

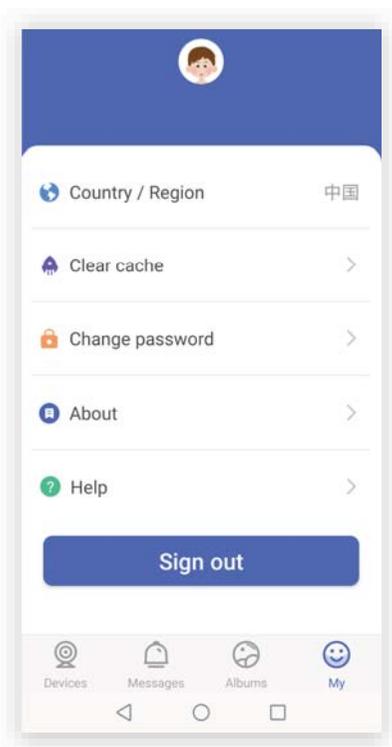

This is the list for the alarm messages grouped by cameras

3.3 Albums

The screenshots and recorded videos are kept here which are grouped by date

3.4 My

You could change profile photo, nick name & password, clear cache and sign out here

4. To be noted

- Please fully charge the camera when the first use
- To reduce false alarms, please do not install the camera close to frequently moving objects, outlets, bright light
- It is not suggested make camera face moving objects straightly, otherwise it may do not detect the movement, a installation angle between camera and detected object is larger than 10 degree recommended

5. Camera Installation

- It could stand alone onto any flat places like desk, chair, windowsill
 - You could also fix it onto wall (wall should be flat and clean)
- ① Use the screwdriver (not in the packing) to fix the iron cap onto the wall, then attach the camera onto the iron cap via magnetic base at the back of camera
 - ② Use the screwdriver to fix the wall mounting bracket onto the wall, then screw the camera into the bracket via the screw hole at the bottom of camera
 - ③ Paste the iron cap onto wall through 3M tape, then attached the camera onto the iron cap with magnetic base at the back of camera
 - ④ Paste the wall mounting bracket onto wall through 3M tape, then screw the bracket into screw hole at the bottom of camera

6. FAQ

A. How many accounts & sharing for each camera?

- ① Each camera could only be bound in one account.
- ② Each camera could be shared with 3 other accounts.

B. What to do to change to another WiFi?

- ① Click device settings icon of camera and click WIFI settings on APP.
- ② Click "Add Network" and input relating info to connect with another WiFi (Pls make sure the info entered are correct).

C. Why the camera would offline?

- ① Please check the strength of WiFi signal.
- ② Please check if the camera battery is exhausted (try to charge and try again).

D. How to wake up the camera?

Normally the camera is in standby status and you could wake it up:

- ① Run iEagelCam Pro APP and watch live video.
- ② The camera would wake up within 1s once the motion is detected.

* The real interface or operation may be little bit different due to iOS & Andriod version and software updates. Any confusions, pls consult your sales representative.
